

After MYP5

To find out more about application to high school, you may contact our Study and Career Guidance Counsellor (SYV) anna.frisk@almhult.se

After MYP 5, students can apply to Pre Diploma Program, Diploma Program or Swedish National Programs.

Applying to Swedish High school and National Programs:

Students within the IB system in Sweden have foreign grades and therefore will apply with so called "fri kvot" when applying to a Swedish National Program. To be eligible, students need a passing grade from Swedish Language Acquisition, Proficiency Level phase 4.

Other than that, students will be eligible if they have a passing grade in at least math, English and 5 other subjects when applying to a vocational program and math, English and 9 other subjects when applying to a study preparatory program. ISÄ will convert the foreign grades in the beginning of June in order for them to be equivalent to Swedish grades. If you want to know more, visit www.utbildningsguiden.se or get in touch with the Study and Career Guidance Counsellor.

Pre Diploma Program and Diploma Program

PreDP (Pre Diploma Program) is a preparatory year for DP (Diploma Program).

- **When applying to PreDP:** Students apply after MYP5 and students need to apply with the Swedish high school admission program, Dexter. Students also take a placement test, to see what level the student is at.
- **When applying to DP:** How students apply to DP is different depending on what schools students apply to. Applicants will also need to take an entrance test in math and English in connection to the application. For more information on how to apply, get in touch with the Study and Career Guidance Counsellor.

ISÄ take following actions to help students in the process:

- Parents meeting with information about high school in autumn.
- Individual meetings with the students in MYP5.
- In - class information for MYP5.
- Parents and students can book meetings with the Study and Career Guidance Counsellor.
